> Fischer's Score	Regularization. (Elastic Nets)	Elimination > Exhaustive
	Regularization. (Elastic Nets)	Elimination
> Alssing Value Ratio,	Regularization.  (Elastic Nets)  Pandom Forest  Importance.	Elimination > Exhaustive

Steps (Feature Selection): i) Data Preprocessing & Analysis , ii) Feature Selection Technique Selection. (iii) Evaluation and Validation. Advantages: f) Efficiency my Improved Model Performance. hi) Enhanced Model Interpretability. Iv) Better Data Visualization. Disadvantages (limitations): their or the morning. Information loss. II) Increased Madel Bias (leads Under fitting). (ii) Computational Cost. raje seli · Harry . S. A.
